

Lab Evaluation 4: Marking Scheme

- 7 test cases. (Total 60 points):
 - For the first 2 test cases 5 points per test case are assigned, and for the last 5 test cases 10 points per test cases were assigned.
 - For each test case marks will be given based on the similarity. For full marks in a test case the code must given 100% correct output.
- 60 points:
 - A proper implementation will fetch 40 points. Partial marks will be awarded according to the amount of correct code written.
 - For a solution that has been provided without using tries, and taking too much of operational time, will only fetch a maximum of 15, irrespective of how correct the code is.
